ABOUT ME

I am a passionate student of Computer Systems Engineering with a particular interest in backend development. I enjoy solving complex problems and building efficient systems. My experience as an Electronic Security Technician has strengthened my ability to work under pressure and focus on detail-oriented tasks. I believe in continuous learning and am always excited to explore new technologies and techniques that push the boundaries of what I can create. Outside of my studies, I love boxing, running, and hiking, which help me stay disciplined and focused.
